

	Monday, March 18	Tuesday, March 19	Wednesday, March 20
8:30-10:15	<ol style="list-style-type: none"> <li>1. Garrett, Bayesian Microarray analysis</li> <li>2. Ying, Semiparametric survival (IMS)</li> <li>3. Shen, Screening</li> <li>4. Schabenberger, Spatial</li> </ol>	<ol style="list-style-type: none"> <li>1. Li, Genetics &amp; survival</li> <li>2. Worsley, Brain Mapping (IMS)</li> <li>3. Gregoire, Regression Spline</li> <li>4. Hughes, HIV</li> </ol>	<ol style="list-style-type: none"> <li>1. Pan, Microarray analysis</li> <li>2. Etzioni, Health Economics</li> <li>3. Loader, Function estimation (IMS)</li> <li>4. Wittes, FDA Advisory</li> </ol>
10:30-12:15	<ol style="list-style-type: none"> <li>1. SIP (IMS, neuroscience)</li> <li>2. Roeder, Haplotype analysis</li> <li>3. Huang, Informative censoring</li> <li>4. Dominici, Air pollution</li> </ol>	<b>Presidential Address</b>	<ol style="list-style-type: none"> <li>1. Liu, Monte Carlo (IMS)</li> <li>2. Ibrahim, Longitudinal&amp;survival</li> <li>3. Borkowf, Categorical data analysis</li> <li>4. Holloran, Vaccine</li> </ol>
1:45-3:30	<ol style="list-style-type: none"> <li>1. Scott, Clustering and Mixture (IMS)</li> <li>2. Nedelman, Biopharm</li> <li>3. Zhou, Reproductive health</li> <li>4. Albert, Diagnostics</li> </ol>	<ol style="list-style-type: none"> <li>1. Zhang, New software (IMS)</li> <li>2. Albert, Surrogate endpoint</li> <li>3. Lin, Spatial optimal design</li> <li>4. Daniels, Longitudinal</li> <li>5. Dunson, Animal experiments</li> </ol>	
3:45-5:30	<ol style="list-style-type: none"> <li>1. Ishwaran, (IMS) Random Partition Distribution</li> <li>2. Naisyin, semiparametric &amp; longitudinal</li> <li>3. Thall, adaptive design</li> <li>4. Barry, Small Area Estimation</li> </ol>	<ol style="list-style-type: none"> <li>1. Umbach, Gene-environmental interaction</li> <li>2. Cook, Dimension Reduction (IMS)</li> <li>3. Rathouz, semiparametric mixed effects models</li> <li>4. Sanchez, Biopharm</li> </ol>
